Tinned Clip-On Ground Kit for Corrugated Coaxial Cable Applications

Product Description

The Clip-On Ground Kit is an advanced coax grounding solution. The unique clip design and preformed strap allows the Clip-On Ground Kit to be easily slipped over the outer conductor of the coax and firmly latched into place. The latch mechanism has been optimized to provide a secure fit, maximizing performance by ensuring proper contact surface area and pressure. The innovative design of the Clip-On Ground Kit greatly simplifies installation, minimizing installation time over traditional coiled and bolt-on grounding kits. This design also eliminates the danger of overtightening, reducing the chance of costly errors in the field. The Clip-On Ground Kit protects coax from the damaging effects of lightning current in excess of 190 kA. Each kit includes a 5' (1.5m) copper ground lead, universal 3/8" two-hole lug with buss bar attachment hardware, one roll of 2-1/2" (63.5mm) x 2' (0.6m) butyl mastic and one roll of 2" (50.8mm) x 20' (6.1m) electrical tape. Clip-On Ground Kits may be configured in additional lead and lug configurations.

*3/8" Two-hole lugs are universal to accommodate 3/4" to 1" spacing requirements.
