Product Reference Sheet

## **Open Weave Hoisting Grips for Coaxial Cable Applications**

#### **Product Description**

Open Weave Hoisting Grips provide an effective means for hoisting coax into position. The Open Weave design allows the hoisting grip to be attached when the run has been connectorized and facilitates easy positioning at 200' (61 m) intervals increments on long coax runs. Open Weave Hoisting Grips are manufactured from Stainless Steel.

#### Note:

Once the cable is hoisted into position, hoisting grips should be fastened to the structure to provide support for the cable. It is not recommended that hoisting grips be reused due to possible hoisting grip failure.
