

J-Mounts

MAR-JPM Series

Product Description

J-Mounts are used for compact antenna mounting application. Pivoted foot design gives flexibility to the installer. J-Mounts are powder coated for superior weather resistance. Wider base design provides additional antenna stability. Reversible pole design for increased mounting flexibility. They are available in different lengths depending on the type of application. Outside diameter of the pipe is 1.66". J-Mounts can be used with U-bolts for pole installations.

Typical Applications

Part Number	Length
MAR-JPM22X	22.75"
MAR-JPM39X	39"
