Galvanized Rigid Conduit (GRC)

Galvanized Rigid Conduit (GRC) is a crucial product in industrial, commercial construction, and residential applications. The inside surface of the rigid metal conduit is extra smooth, making wire pulling and pushing easy and ensuring higher wire capacity and no risk of wire obstruction.

Features:

- Made of carbon steel coil
- Hot dip galvanized surface finish
- Superior corrosion resistance
- Range of diameters from 1/2" to 6"
- Smooth surface reduces friction between pipe wall and wire
- Both ends threaded using coupling on one end and a plastic protector on the opposite end
- Meets or exceeds ANSI C80.1 and UL6 standards
- UL Listed
